INDEX TO VOLUME XXIV

Acid production and tolerance of lactobacilli from dental caries and other sources as measured by the glass electrode 321
Adsorption experiments with the virus of vaccinia 133
Aeration, An, train for the study of products of bacterial metabolism 169
Aeration, The influence of, and of sodium chloride upon the growth curve of bacteria in various media 185
Aerobacter aerogenes and *Escherichia coli*, A note concerning the effect of a specific environment on the characteristics and viability of several strains of 317
Agar, blood and chocolate, Types of bacteria on, and the immediate cause of these types 473
Alpha-methyl-d-glucoside, The fermentation of, by members of the coli-aerogenes group 267
Application, An, of the autocatalytic growth curve to microbial metabolism 145
Autocatalytic growth curve, An application of the, to microbial metabolism 145

Bacillus mycoides, A contribution to the physiology of spore production in. Studies on bacterial spores, III 85
—— ——, Dissociation and life cycle of 381
—— *putrificus Bienstock*, The identity of 61
——, tubercle, Effects of pancreatic enzymes on the 341
Bacteria exposed to alkalinity and heat, Factors determining the rate of mortality of 243
——, Factors influencing the reduction of nitrates and nitrites by, in semisolid media 273
—— in liquid plates, Uniform growth and progression of mobile colonies of 53
—— in various media, The influence of aeration and of sodium chloride upon the growth curve of 185
——, The production of hydroxylamine by the reduction of nitrates and nitrites by various pure cultures of 489
Bacteria, Types of, on blood and chocolate agar and the immediate cause of these types 473
Bacterial cell, Metabolic activity of the, at various phases of the population cycle 209
—— metabolism, An aeration train for the study of products of 169
—— spores, Studies on III. A contribution to the physiology of spore production in *Bacillus mycoides* 85
Beckwith, T. D., and Moser, J. R. The reduction of sulphur containing compounds in wood pulp and paper manufacture 43
Berg, W. N. Effects of pancreatic enzymes on the tubercle bacillus 341
Bibb, L. B. Uniform growth and progression of mobile colonies of bacteria in liquid plates 53

Biological and chemical studies of the Lactobacillus genus with special reference to xylose fermentation by *L. pentoaceticus* 1
Brannon, J. M., Park, S. E., Graham, Robert, and Prucha, M. J. Pasteurization of milk artificially infected with two strains of *Brucella suis* 469
Brucella suis, Pasteurization of milk artificially infected with two strains of ... 469
Brunstetter, B. C., and Magoon, C. A. Studies on bacterial spores. III. A contribution to the physiology of spore production in *Bacillus mycoides* ... 85

Castles, Ruth, Miller, C. Phillip, Jr., and Hastings, A. Baird. The influence of inorganic salts on the multiplication of the gonococcus 439
Chemical, biological and, Studies of the Lactobacillus genus with special reference to xylose fermentation by *L. pentoaceticus* 1
Chitin-destroying bacteria, Some observations on 335
Coli-aerogenes groups, The fermentation of alpha-methyl-d-glucoside by members of the 267
Culture media, A note on reaction changes during sterilization of vegetable extract 457
Cunningham, Andrew. The identity of *Bacillus putrificus Bienstock* 61

Davey, W. P., Dozois, K. P., Tittsler, R. P., and Lisse, M. W. The effect of "low voltage" X-rays on the electrophoretic migration velocity, viability and pH of *Escherichia coli* suspensions 123
Dental caries, Acid production and tolerance of lactobacilli from, as measured by the glass electrode 321
Dissociation and life cycle of *Bacillus mycoides* 381
—— and sensitiveness to normal serum in dysentery bacilli of Type III 301
—— of *Mycobacterium leprae* 357
Dozois, K. P., Tittsler, R. P., Lisse, M. W., and Davey, W. P. The effect of "low voltage" X-rays on the electrophoretic migration velocity, viability and pH of *Escherichia coli* suspensions 123
Dysentery bacilli of Type III, Dissociation and sensitiveness to normal serum in 301

Edwards, Philip R. Studies on rough and smooth variants of *Shigella equirulis* (*B. nephritidis-equi*) 283
Effect, The, of "low voltage" X-rays on the electrophoretic migration velocity, viability and pH of *Escherichia coli* suspensions 123
Effects of pancreatic enzymes on the tubercle bacillus 341
Electrode, glass, Acid production and tolerance of lactobacilli from dental caries and other sources as measured by the 321
Electrophoresis studies. Studies on *Lactobacillus acidophilus* and *Lactobacillus bulgaricus*. II 73
Electrophoretic migration velocity, viability and pH of *Escherichia coli* suspensions, The effect of "low voltage" X-rays on the 123
Enzymes, pancreatic, Effects of, on the tubercle bacillus 341
Escherichia coli, A note concerning the effect of a specific environment on the characteristics and viability of several strains of *Aerobacter aerogenes* and 317

Escherichia coli, suspensions, The effect of "low voltage" X-rays on the electrophoretic migration velocity, viability and pH of..... 123
Esmarch cultures, Mechanical spinner for..... 29

Factors determining the rate of mortality of bacteria exposed to alkalinity and heat..... 243
—— influencing the reduction of nitrates and nitrites by bacteria in semi-solid media..... 273
Fermentation, The, of alpha-methyl-d-glucoside by members of the coli-aerogenes group..... 267
Filtration technic..... 29

Gee, Haldane. Filtration technic..... 29
—— ——. Mechanical spinner for Esmarch cultures..... 35
Gonococcus, The influence of inorganic salts on the multiplication of..... 439
Graham, Robert, Park, S. E., Prucha, M. J., and Brannon, J. M. Pasteurization of milk artificially infected with two strains of *Brucella suis*..... 469
Greaves, J. Dudley, and Pulley, H. C. An application of the autocatalytic growth curve to microbial metabolism..... 145

Hastings, A. Baird, Miller, C. Phillip, Jr., and Castles, Ruth. The influence of inorganic salts on the multiplication of gonococcus..... 439
Hydroxylamine, The production of, by the reduction of nitrates and nitrites by various pure cultures of bacteria..... 489

Identity, The, of *Bacillus putrificus Bienstock*..... 61
Influence, The, of aeration and of sodium chloride upon the growth curve of bacteria in various media..... 185
——, The, of inorganic salts on the multiplication of gonococcus..... 439

Johnson, Delia E. Some observations on chitin-destroying bacteria..... 335

Koser, Stewart A., and Saunders, Felix. The fermentation of alpha-methyl-d-glucoside by members of the coli-aerogenes group..... 267
Kulp, Walter L. A note concerning the effect of a specific environment on the characteristics and viability of several strains of *Aerobacter aerogenes* and *Escherichia coli*..... 317

L. pentoaceticus, Biological and chemical studies of the Lactobacillus genus with special reference to xylose fermentation and..... 1
Lactobacilli, Acid production and tolerance of, from dental caries and other sources as measured by the glass electrode..... 321
Lactobacillus acidophilus and *Lactobacillus bulgaricus*. II. Electrophoresis studies..... 73
Lactobacillus bulgaricus, Studies on *Lactobacillus acidophilus* and. II. Electrophoresis studies..... 73
Lactobacillus genus, Biological and chemical studies of the, with special reference to xylose fermentation by *L. pentoaceticus*..... 1

Leifson, Einar. Types of bacteria on blood and chocolate agar and the immediate cause of these types 473
Lethal effect of alternating current on yeast cells 423
Lewis, I. M. Dissociation and life cycle of *Bacillus mycoides* 381
Lindsey, Glen A., and Rhines, Chester M. The production of hydroxylamine by the reduction of nitrates and nitrites by various pure cultures of bacteria 489
Liquid plates, Uniform growth and progression of mobile colonies of bacteria in 53
Lisse, M. W., Dozois, K. P., Tittsler, R. P., and Davey, W. P. The effect of "low voltage" X-rays on the electrophoretic migration velocity, viability and pH of *Escherichia coli* suspensions 123
"Low voltage" X-rays, The effect of, on the electrophoretic migration velocity, viability and pH of *Escherichia coli* suspensions 123

Magoon, C. A., and Brunstetter, B. C. Studies on bacterial spores. III. A contribution to the physiology of spore production in *Bacillus mycoides* ... 85
McClung, L. S. A note on reaction changes during sterilization of vegetable extract culture media 457
Mechanical spinner for Esmarch cultures 29
Metabolic activity of the bacterial cell at various phases of the population cycle 209
Microbial metabolism, An application of the autocatalytic growth curve to ... 145
Miller, C. Phillip, Jr., Hastings, A. Baird, and Castles, Ruth. The influence of inorganic salts on the multiplication of gonococcus 439
Milk, Pasteurization of, artificially infected with two strains of *Brucella suis* .. 469
Mortality of bacteria exposed to alkalinity and heat, Factors determining the rate of 243
Moser, J. R., and Beckwith, T. D. The reduction of sulphur containing compounds in wood pulp and paper manufacture 43
Mycobacterium leprae, Dissociation of 357

Nitrates and nitrites, Factors influencing the reduction of, by bacteria in semisolid media 273
—— —— ——, The production of hydroxylamine by the reduction of, by various pure cultures of bacteria 489
Note, A, concerning the effect of a specific environment on the characteristics and viability of several strains of *Aerobacter aerogenes* and *Escherichia coli* 317
——, ——, on reaction changes during sterilization of vegetable extract culture media 457

Paper manufacture, The reduction of sulphur containing compounds in wood pulp and 43
Park, S. E., Graham, Robert, Prucha, M. J., and Brannon, J. M. Pasteurization of milk artificially infected with two strains of *Brucella suis* 469
Pasteurization of milk artificially infected with two strains of *Brucella suis* 469
Population cycle, Metabolic activity of the bacterial cell at various phases of the 209

Production, The, of hydroxylamine by the reduction of nitrates and nitrites by various pure cultures of bacteria 489
Prucha, M. J., Park, S. E., Graham, Robert, and Brannon, J. M. Pasteurization of milk artificially infected with two strains of *Brucella suis* 469
Pulley, H. C., and Greaves, J. Dudley. An application of the autocatalytic growth curve to microbial metabolism 145

Reduction, The, of sulphur containing compounds in wood pulp and paper manufacture 43
Reed, G. B. Dissociation of *Mycobacterium leprae* 357
Rettger, Leo F., and Weinstein, Louis. Biological and chemical studies of the Lactobacillus genus with special reference to xylose fermentation by *L. pentoaceticus* 1
Rhines, Chester M., and Lindsey, Glen A. The production of hydroxylamine by the reduction of nitrates and nitrites by various pure cultures of bacteria 489
Rosebury, Theodor. Acid production and tolerance of lactobacilli from dental caries and other sources as measured by the glass electrode 321

Salts, The influence of inorganic, on the multiplication of gonococcus 439
Saunders, Felix, and Koser, Stewart A. The fermentation of alpha-methyl-d-glucoside by members of the coli-aerogenes group 267
Shigella equirulis (*B. nephritidis-equi*), Studies on rough and smooth variants of 283
Sodium chloride, The influence of aeration and of, upon the growth curve of bacteria in various media 185
Some observations on chitin-destroying bacteria 335
Specific environment, A note concerning the effect of, on the characteristics and viability of several strains of *Aerobacter aerogenes* and *Escherichia coli* 317
Spinner, Mechanical, for Esmarch cultures 29
Spore production, A contribution to the physiology of, in *Bacillus mycoides*. Studies on bacterial spores. III 85
Studies on bacterial spores. III. A contribution to the physiology of spore production in *Bacillus mycoides* 85
Studies on *Lactobacillus acidophilus* and *Lactobacillus bulgaricus*. II. Electrophoresis studies 73
Studies on rough and smooth variants of *Shigella equirulis* (*B. nephritidis-equi*) 283
Sulphur containing compounds, The reduction of, in wood pulp and paper manufacture 43
Sutermeister, Margaret, Winslow, C.-E. A., and Walker, H. H. The influence of aeration and of sodium chloride upon the growth curve of bacteria in various media 185

Tang, F. F. Adsorption experiments with the virus of vaccina 133
Thjøtta, Th., and Waaler, Erik. Dissociation and sensitiveness to normal serum in dysentery bacilli of Type III 301

Tittsler, R. P., Dozois, K. P., Lisse, M. W., and Davey, W. P. The effect of "low voltage" X-rays on the electrophoretic migration velocity, viability and pH of *Escherichia coli* suspensions 123
Tracy, Ralph L., Jr. Lethal effect of alternating current on yeast cells 423
Tubercle bacillus, Effects of pancreatic enzymes on the 341
Types of bacteria on blood and chocolate agar and the immediate cause of these types 473

Uniform growth and progression of mobile colonies of bacteria in liquid plates 53

Vaccinia, Adsorption experiments with the virus of 133
Variants of *Shigella equirulis* (*B. nephritidis-equi*), Studies on rough and smooth 283
Vegetable extract culture media, A note on reaction changes during sterilization of 457

Waaler, Erik, and Thjøtta, Th. Dissociation and sensitiveness to normal serum in dysentery bacilli of Type III 301
Walker, Harold H. An aeration train for the study of products of bacterial metabolism 169
——, and Winslow, C.-E. A. Metabolic activity of the bacterial cell at various phases of the population cycle 209
——, Winslow, C.-E. A., and Sutermeister, Margaret. The influence of aeration and of sodium chloride upon the growth curve of bacteria in various media 185
Watkins, J. H., and Winslow, C.-E. A. Factors determining the rate of mortality of bacteria exposed to alkalinity and heat 243
Weaver, R. H. Studies on *Lactobacillus acidophilus* and *Lactobacillus bulgaricus*. II. Electrophoresis studies 73
Weinstein, Louis, and Rettger, Leo F. Biological and chemical studies of the *Lactobacillus genus* with special reference to xylose fermentation by *L. pentoaceticus* 1
Winslow, C.-E. A., and Walker, Harold H. Metabolic activity of the bacterial cell at various phases of the population cycle 209
——, Walker, Harold H., and Sutermeister, Margaret. The influence of aeration and of sodium chloride upon the growth curve of bacteria in various media 185
——, and Watkins, J. H. Factors determining the rate of mortality of bacteria exposed to alkalinity and heat 243
Wood pulp and paper manufacture, The reduction of sulphur containing compounds in 43

Xylose fermentation by *L. pentoaceticus*, Biological and chemical studies of the Lactobacillus genus with special reference to 1

Yeast cells, Lethal effect of alternating current on 423

ZoBell, C. E. Factors influencing the reduction of nitrates and nitrites by bacteria in semisolid media 273
